

Ingenious Sudoku

How it works:

This Sudoku is not a number but a tile puzzle. Fill the white hexagons with the 6 different Ingenious tiles so that each column, each row, and each of the six 2x3 blocks contain all of the tiles. Find out which color the tile in the blue marked hexagon needs to be.

How you can win:

Send us a private message on Facebook www.facebook.com/UnitedSoftMedia or Twitter @USM_News or via E-Mail to info@usm.de until March, 31st and tell us, which color we are looking for.

If you are lucky you can win a big Ingenious surprise package.

Good luck!
